# v0.3.20 Session Log & Fixes
## Date
2025-09-17
## Summary of Fixes
- Negative-headline exclusion: ensured stocks with bearish headlines (e.g., "revenue falls") are excluded.
- Log clarity: enrich logs now show `[DROP NEG]` instead of `[KEEP]` for negative headlines.
- Sanitize catalyst_scores CSV: negative headlines rewritten to `score=0` on disk.
- Magnitude-aware scoring: parsed % changes in revenue/guidance from headlines.
- Example:
  - 0–14% → score 1.0 (B)
  - 15–34% → score 2.0 (A)
  - 35–59% → score 2.5 (A+)
  - 60%+ → score 3.0 (super-A)
- Debug lines: `[MAG]` lines show upgrades when % detected.
- One-pager summary: each run writes
  `out/YYYYMMDD/_final/summary_only_YYYY-MM-DD.txt`.
