

Midas Project – Post-Cleanup Sanity Check

Date: 2025-09-07

Version: v0.3.7-cleanup

Folder: Docs/versions/4.1 planned tweaks/

Purpose

To confirm that the cleanup operation (archiving unused `.bak`` and `.backup`` files, plus adding `tools/cleanup_repo.py``) did not disrupt core functionality.

Command Executed

```
```bash
python scripts/summarize_results.py --date 2025-08-05
```
```

Results (2025-08-05)

- **Scenario A:** TP=29, SL=10 → **Win% = 74.36%**
- **Scenario B:** TP=4, SL=6 → **Win% = 40.0%**
- **Scenario C:** TP=29, SL=10 → **Win% = 74.36%**
- **Scenario D:** TP=4, SL=6 → **Win% = 40.0%**
- **Scenario E2:** TP=2, SL=0 → **Win% = 100.0%**
- **Scenario E, E_cfg, E_cfg2, E_debug, E_vwapoff:** 0 trades (no signals)

Conclusion

- The cleanup **did not affect backtest functionality**.
- Scenarios A and C still perform strongly (~74% WR).
- Scenarios B and D remain weaker (~40% WR).
- E2 triggered with 100% WR on 2 trades.
- Other E variants produced no trades.

The repository at **v0.3.7-cleanup** is verified stable.

Next Steps

- Proceed with planned ****win rate and profit improvement tweaks**** (Scenarios B/D/E).
- Optionally document similar sanity checks after future cleanup/version bumps.
