

A–E Robustness & Integration Plan (v0.3.9)

- Validate September: $D \rightarrow E \rightarrow B \rightarrow A \rightarrow C$ with existing runner.
- Gates: $D \text{ WR} \geq 58\text{--}60\% + \text{positive PnL}$; $E \text{ WR} \geq 50\text{--}55\% + \text{positive PnL}$.
- After baseline: hygiene + RVOL gate, then router; risk sizing later.
