

Midas_V2 – Test Commands Cheat Sheet (v0.3.24)

****Last updated:**** 2025-09-20 21:36 (America/Chicago)

> One-liners only (your preference). Default: Python scripts, no PowerShell wrappers necessary.

Single Day ****Scenario B (baseline):**** ``powershell # Default (Top-50) python scripts/run_day_simple.py --date 2025-08-05 --scenario B

Trim to Top-12 python scripts/run_day_simple.py --date 2025-08-05 --scenario B --top 12

Trim to Top-20 python scripts/run_day_simple.py --date 2025-08-05 --scenario B --top 20 ``

****Scenario D (strict):**** ``powershell python scripts/run\_day\_simple.py --date 2025-08-05 --scenario D ``

****Scenario E (dip reclaim):**** ``powershell python scripts/run\_day\_simple.py --date 2025-08-05 --scenario E ``

Range (August 2025) ``powershell # Default (Top-50) python scripts/run_range_and_summarize.py --start 2025-08-05 --end 2025-08-31 --scenario B

Trim to Top-12 per day (requires patched runner) python scripts/run_range_and_summarize.py --start 2025-08-05 --end 2025-08-31 --scenario D --top 12 ``

Analyzer (Range Summaries) Use the CSVs in `out/auto/` folders (not `out/range\_summaries`).

****Scenario B:**** ``powershell python scripts/analyze\_range\_explained.py --csv out\auto\range\_summary\_20250805\_20250831\_B.csv ``

****Scenario D:**** ``powershell python scripts/analyze\_range\_explained.py --csv out\auto\range\_summary\_20250805\_20250831\_D.csv ``

****Scenario E:**** ``powershell python scripts/analyze\_range\_explained.py --csv out\auto\range\_summary\_20250805\_20250831\_E.csv ``

Quick Paths - Per-day CSVs: `out/YYYYMMDD\<Scenario>\results\_YYYY-MM-DD.csv` - Per-day summary: `out/YYYYMMDD\<Scenario>\summary\_only\_YYYY-MM-DD.txt` - Range summary CSVs: `out\auto\range\_summary\_YYYYMMDD\_YYYYMMDD\_<Scenario>.csv`

Notes - ****Top behavior:**** By default, universes are trimmed to Top-50 gappers. Use `--top N` to override (e.g., `--top 12`, `--top 20`). - Current gates: `riseBars=3` (on), `macd\_riseBars=0` (off). - Keep B as baseline; run D and E after to compare.
